PROFILE

Cloud & DevOps Engineer with 9+ years of IT experience, combining AWS infrastructure engineering in Singapore GCC/GCC+ environments with a strong enterprise networking foundation. Deliver Terraform-based infrastructure automation, GitLab CI/CD, IAM/OIDC integration, cloud security and operational monitoring. CNCF Kubestronaut with independent Kubernetes, HCP Vault/Boundary and policy-as-code platform projects.

TECHNICAL SKILLS

AWS & Cloud	GCC/GCC+, EC2, VPC, ALB/NLB, API Gateway, VPC endpoints, S3, WAF, CloudWatch, ACM, EventBridge
IaC & CI/CD	Terraform, reusable modules, remote state, GitLab CI/CD, SHIP-HATS, GitLab Runners, OIDC, Ansible
Platform (labs)	Kubernetes, EKS, ECS/Fargate, Docker, Helm, HPA, Kong Gateway API, VPC Lattice, Envoy
Security & Governance	IAM Identity Center (SSO), Security Groups/NACLs, Fortinet, Vault/Boundary (labs), PKI, OPA/Rego (labs)
Observability & Ops	CloudWatch, SNS, StackOps (ELK/Kibana), Datadog (labs), Zabbix, NetBox; Bash, PowerShell
Network Engineering	Cisco, Juniper, BGP, MPLS, OSPF, IS-IS, routing, SD-WAN, FortiManager, FortiAnalyzer

CERTIFICATIONS

- AWS Certified DevOps Engineer – Professional
- AWS Certified Solutions Architect – Associate
- Cisco CCNP Enterprise (ENCOR · ENARSI)
- CNCF Kubestronaut (CKA · CKAD · CKS · KCNA · KCSA)
- HashiCorp Certified: Terraform Associate
- Cisco Certified Network Associate (CCNA)

PROFESSIONAL EXPERIENCE

NCS PTE Ltd | Cloud Engineer

Jan 2024 – Present

Singapore · Contract via Avensys Consulting

- Operate AWS infrastructure in Singapore GCC/GCC+ environments, including VPC, load balancers, VPC endpoints, API Gateway, WAF, IAM and CloudWatch.
- Develop Terraform modules for CSV-driven Security Group/NACL rules in GCC+, with remote state and Git-based version control.
- Engineered AWS ACM and GitLab CI/CD certificate lifecycle workflows for **12** public-facing and intranet applications across UAT and production, including ALB-attached TLS certificates and SHIP-HATS/GovTech CTS automation.
- Built EventBridge-triggered GitLab/Ansible certificate rotation for **197** Windows IIS and Linux Nginx servers, using IAM role-authorized ACM exports, PFX conversion, IIS binding updates and resource-group-specific child pipelines.
- Provision Terraform-managed GitLab Runners and AWS CLI/Terraform container images for infrastructure CI/CD pipelines.
- Configure IAM Identity Center (SSO) and GitLab OIDC trust for secure, automated AWS deployments.
- Integrate API Gateway, Lambda and Nginx reverse proxy for partner agency APIs; configure CloudWatch/SNS alerts and StackOps (ELK/Kibana) monitoring.
- Manage AWS WAF, Trend Micro Vision One and EC2-hosted Fortinet firewalls with FortiManager/FortiAnalyzer.

Gain City Electronic PTE Ltd | Infra Engineer

Feb 2023 – Dec 2023

Singapore

- Maintained hybrid AWS/on-premises connectivity via Direct Connect; diagnosed VPC routing, firewall, load-balancer and application access issues.
- Operated L2/L3 enterprise networks, Fortinet firewalls, Secure SD-WAN, Active Directory and Darktrace NDR.
- Maintained NetBox/Cacti/Zabbix inventory and monitoring, plus operational documentation.

Frontiir Co., Ltd. | **Network Engineer** *Apr 2021 – Jan 2023*

Yangon, Myanmar

- Designed IP addressing and implemented BGP, MPLS, OSPF and IS-IS across Cisco, Juniper and Extreme networks, including carrier-grade NAT infrastructure.
- Implemented TACACS+/AAA access controls, led regional network migrations and maintained HLD/LLD, MOP and SOP documentation.

Mytel Myanmar | **Internet Core Engineer** *Jul 2020 – Feb 2021*

Yangon, Myanmar

- Troubleshot fixed-broadband core networks and supported BRAS/OLT deployments across Juniper, Huawei and ZTE platforms; maintained monitoring and operational procedures.

Frontiir Co., Ltd. | **Associate Network Engineer** *May 2018 – Jun 2020*

Yangon, Myanmar

- Configured distribution/access networks and OSPF/IS-IS on Linux-based routers; resolved network faults and supported new township deployments.

Frontiir Co., Ltd. | **Assistant Network Engineer** *Apr 2017 – May 2018*

Yangon, Myanmar

- Installed switches, routers, wireless links and public Wi-Fi systems using Ubiquiti, Ruckus and Cambium devices; maintained network documentation.

SELECTED TECHNICAL PROJECTS | PERSONAL LABS & POCS

Boundary Worker Autoscaling on Kubernetes

- Designed a Datadog-driven Kubernetes HPA/StatefulSet PoC for HCP Boundary workers. Automated worker registration and scale-in deregistration using Vault Kubernetes authentication and pod lifecycle hooks.

Repo: boundary-k8s-autoscaling-poc

HCP Terraform VCS & OPA Policy Guardrails

- Built GitLab-linked HCP Terraform workspaces with remote-state dependencies and run triggers; authored OPA/Rego rules for EC2 sizing, subnet CIDRs, and Security Group/NACL configuration with test fixtures.

Repo: tf-vcs

ECS Fargate, VPC Lattice & Envoy mTLS

- Created Terraform for ECS Fargate services connected via VPC Lattice TLS passthrough and Envoy sidecar mTLS, integrating ACM Private CA, AWS Secrets Manager, SSM Parameter Store and private DNS.

Repo: tf-ecs

GitLab CI + Ansible: Vault SSH CA Trust

- Automated deployment of Vault SSH CA trust and TrustedUserCAKeys to private Linux targets using an in-cluster GitLab Runner and Ansible, including idempotent updates, sshd validation and deployment checks.

Repo: ansible-lab

More labs: EKS infrastructure with Terraform · Kong API Gateway on EKS · HCP Vault Dedicated on AWS

EDUCATION

Master of Science (MSc) in Cyber Security *Mar 2025 – Jul 2026*

University of West London, UK | Aventis School of Management, Singapore | Part-time

Bachelor of Arts (BA) in English *2014 – 2018*

Yangon University of Distance Education, Myanmar
